BSc Design and Multimedia
FCTUC - University of Coimbra
2020 - 2025

MSc Electrical and Computer Engineering (not completed)
FCTUC - University of Coimbra
2014 - 2019

+EXPERIENCE

Visual Identity Lead
BEST Coimbra | 2017

Comms Coordinator
NEEEC - FCTUC | 2017

EXPERIENCE

Full-Stack Developer

Startup Portugal | 2026

- Developed SIMsync, a **Python** and **Tkinter** application integrating **REST APIs** to automate CSV imports, data processing and synchronisation with the Brella event platform.
- Took full ownership of the tool and mobile app operations, implementing API integrations, data validation and automated workflows to streamline participant, speaker and schedule management.
- Managed live app operations for 4,000+ attendees, 450+ startups, 270+ investors and 130+ speakers, resolving technical issues and ensuring reliable data synchronisation throughout the event.

Front-End Developer

Doppel, IPN Coimbra | 2023

- Led the company's visual identity and website development, taking the project from initial design to a fully deployed website.
- Designed and built the website from scratch using **React**, **TypeScript** and **Tailwind** CSS, incorporating interactive 3D experiences with **Three.js**.
- Handled deployment, maintenance and updates, ensuring a consistent visual experience and a reliable, responsive website.

PROJECTS more on GitHub

Extra Time

C# · .NET · React · TypeScript · SQLite

Built and deployed a football goals aggregator with automated data collection, team and scorer search, video playback and viewing history.

Image Desk

React · TypeScript · Canvas API

Built a browser-based tool to resize and convert images in batches, with live previews and ZIP downloads. All processing happens locally, keeping files private.
